DANG HUU NGHIA

FRONTEND DEVELOPER

👤 Male ✉ danghuunghia2k3@gmail.com 📞 0589151934 📅 Nov 17, 2003 🏠 Hung Phu, Cai Rang, Can Tho

ℹ Objective

- **Short-term goal:** Strive to learn processes related to the job and apply the knowledge along with acquired skills to internship objectives.
- **Long-term goal:** Aim to secure a permanent position after the internship period, effectively apply the latest technologies, and participate in larger-scale projects.

✎ Technical Skills:

Back-end Development:
- **PHP:** Basic understanding for back-end development in e-commerce applications.
- **C#:** .NET framework, ASP.NET Core, LINQ, async/await, and Entity Framework.

Front-end Development:
- **HTML:** Semantic HTML, form handling, accessibility best practices, and SEO basics.
- **CSS:** Flexbox, Grid, responsive design, animations, preprocessors (Sass/Less), and CSS frameworks (Bootstrap).
- **JavaScript:** ES6+, DOM manipulation, event handling, AJAX, JSON, and working with RESTful APIs.

Frameworks:
- **React:** Understanding of React components, state management, and lifecycle methods.
- **Bootstrap:** Responsive design, grid system, utility classes, and customizing themes.

Databases:
- **SQL Server:** T-SQL, stored procedures, indexing, query optimization, and database design.
- **MySQL:** Database normalization, transactions, joins, subqueries, and MySQL Workbench.

🎓 Education

NAM CAN THO UNIVERSITY, Major: Computer Science

Sep 2021 - Present

GPA: 2.9/4

💼 Work experience

Academic Records Manager, Team Member - Full-Stack Developer

AUG 2023 - JAN 2024

- **Description:** The Academic Records Manager is a comprehensive application designed to streamline the management of academic records within an educational institution. Key features include:
  1. Student Information Management: Allows for detailed tracking and updating of student information, including personal details, enrollment status, and academic progress.
  2. Teacher Information Management: Enables the efficient management of teacher profiles, including contact information, subjects taught, and class schedules.
  3. Management of Departments, Classes, Subjects, Grades, and Statistics: Provides tools for organizing and maintaining information related to various departments, class rosters, subject listings, and grading records. The application also includes statistical analysis features to monitor and report on academic performance across different dimensions.
  4. System Login: Secure login functionality to ensure that only authorized personnel can access and manage the system's data.
- **Technologies:** .NET Framework, C#, ASP.NET, SQL Server
- **GitHub:** https://github.com/CTECOCO/QL-Diem-SV

Fashion Store Web, Personal Project - Full-Stack Developer

FEB 2023 - JUL 2024

- **Description:** The Fashion Store Web is an e-commerce website dedicated to selling fashion products. Key features include:
  1. Online Fashion Store: A user-friendly interface for browsing and purchasing fashion items such as clothing, accessories, and footwear.
  2. Product Search by Category: Allows users to search for products based on specific categories, making it easier to find desired items quickly.
  3. Add Products to Cart: Users can add selected products to their shopping cart for later review and purchase.
  4. Order Placement: Facilitates the complete ordering process, including selecting items, entering shipping details, and processing payments.
  5. Admin Functions for Product Management: Administrators have the ability to add, edit, delete, and approve products listed on the website, ensuring that the inventory remains up-to-date and accurate.
- **Responsibilities:**
  1. Customer Side: Implemented features like login, registration, product

Other Tools:

- **Git:** Version control, branching, merging, conflict resolution, and using Git in team environments.
- **GitHub:** Repository management, pull requests, code reviews, and GitHub Actions.
- **Jira:** Project management, creating and tracking issues, sprint planning, and agile methodologies.
- **Azure:** Azure DevOps, Azure Functions, Blob Storage, and deploying applications to Azure App Service.
